

Installation Instructions for DELTRAX 5

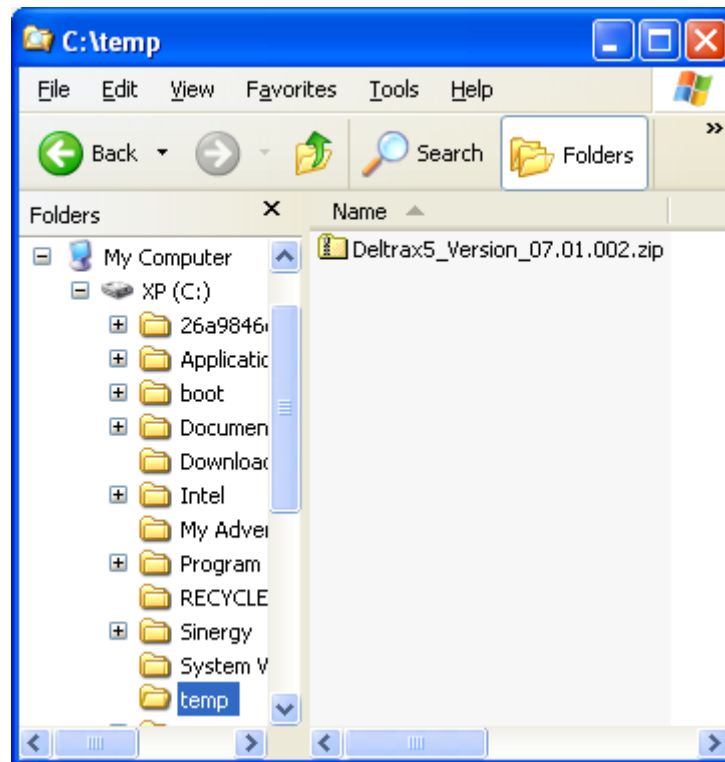

1. First, go to the Sinergy website at www.sinergy-meters.com/software, you will see the Deltrax5 download link, click this link to download the ZIP file.
2. When you click on the download link, you will be asked if you want to save or open the ZIP file.....

3. Ensure that the 'Save File' radio button is checked. If you are using Firefox, the file will be saved to your predetermined download directory when you click OK.
4. If you are using Internet Explorer, you will see the following window, which will allow you to click 'Save' to save the file into a directory of your choice:

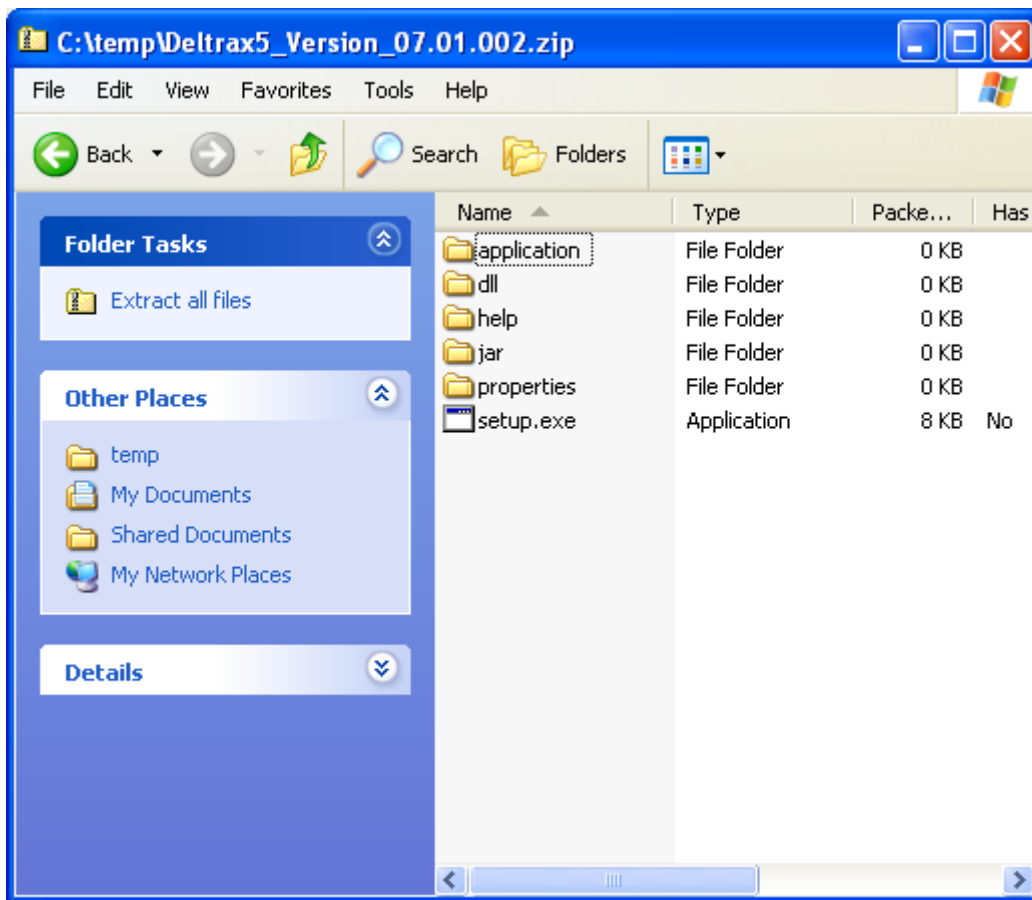

5. Once you have downloaded the file, open up the directory where you have saved it.
6. In the following example, the file can be found in the directory **c:\temp**

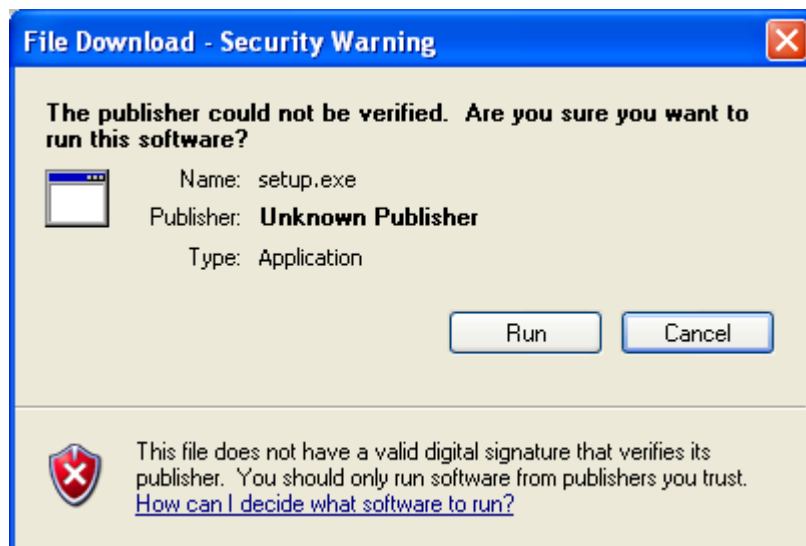

7. As you can see, this file has a **.zip** extension. All Windows versions such as XP, Vista and Windows 7 can directly open a **.zip** file, but if you are using a different version of Windows you may need a utility such as WinZIP to open this file. WinZip can be downloaded from www.winzip.com

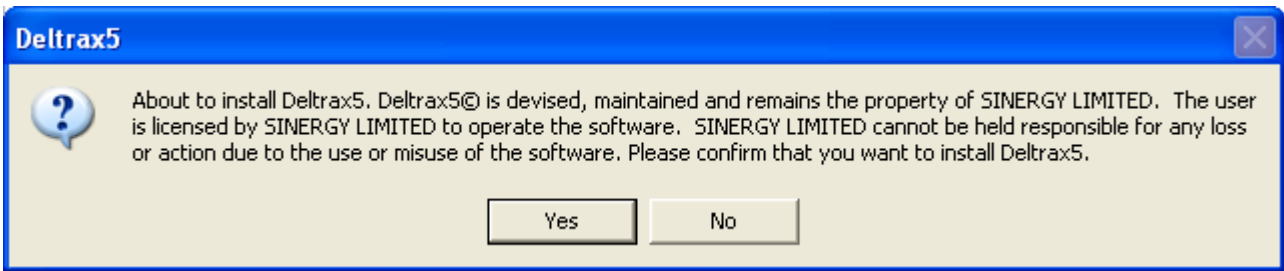

8. Once you open this file you will be presented with something that looks like the following:

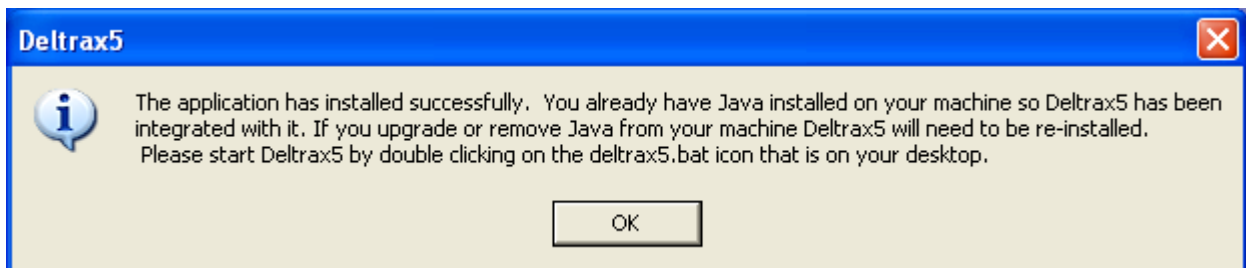

9. At this point, locate the **setup.exe** file, and double click, you may then be presented with the following message (or something similar dependent upon your operating system and virus protection software):

10. Click run at this point and you will be presented with the following message:

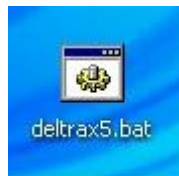

11. If you are happy with the terms and conditions, Click Yes, and the software will install. This will only take a short time. If your P.C. has small amounts of RAM, you may get a warning message to inform you that Deltrax5 performance could be affected by this. Finally, you should get the following message:

12. Please read this message and click OK.

13. If you check your windows desktop you should now be able to see an icon that looks like this:

14. Double click on this icon and Deltrax5 will start.

TroubleShooting

1. Most problems encountered with Deltrax5 installation are due to the user not having installation rights to access certain directories. If you are having trouble with the installation, check with your system administrator that your user account has access to write to the following areas on your P.C.
 - C:\Program Files\Java
 - C:\Sinergy\
2. On most up to date P.C.'s Java will already have been installed. Deltrax5 can work with Java versions from 1.4.2 upwards. If the installation program informs you that you do not have java on your P.C, then just follow this link to download and install the latest Java version from Sun Microsystems:

<http://www.java.com/en/download/index.jsp>

3. For any other problems that occur during installation, please contact:
